Academic Improvement Scholarship

WONG HO LUN

Associate of Science in Environmental Studies

Over the past year, Ho Lun made an improvement of over 20% in his Semester GPA, now reaching the top boundary of the 4.0 GPA scale. When his classmates asked him to share his secrets of improvement, he hinted not the usual ideas of studying hard, reading more or setting a study plan but “Just relax!”. Working out positive results with a relaxed attitude like him is a technique not readily applicable to many students, for it requires strong self-confidence, self-discipline and the right personality alongside hard work. His teacher has confirmed that Ho Lun is a hardworking, energetic and cheerful person. Last summer, he joined the Study Tour to visit Finland. He was a volunteer worker for the WWF Walk for Nature in 2017.
