

Academic Performance Scholarship

AU WING TAI

Associate of Science in Environmental Studies

Wing Tai has a strong concern for the earth. He believes, "As we have to live in this environment, we have to live with it well." This personal belief was a major reason leading to his selection of environmental studies in this College. In the past two years in the College, Wing Tai has been performing well in this subject he loves, always obtaining a Semester GPA in the high range. He has been placed on the Principal's List and his consistently good academic performance has earned him this Scholarship in the current year. Wing Tai's passion for the subject is not just reflected in his studies but also in his extra-curricular pursuits. For several years, he has been a voluntary worker for the WWF Walk for Nature and Green Sense. He is a Marine Mammal Ambassador in CityU and is an Organic Ambassador of HK Organic Resource Centre.
