

Academic Performance Scholarship

LEUNG KA WAI

Associate of Science in Environment Studies

Ka Wai said he is in love with nature. "I'm grateful to the College for giving me a chance to explore nature and study its close relationships with human development. The field trips organized by lecturers of my Associate Degree programme are so inspiring," commented Ka Wai. Admittedly Ka Wai is convinced he has chosen the right programme of study in the College which has much enhanced his interest in nature. It also works the other way round – his personal interest has facilitated his deep understanding of the subject and hence his good academic results. The saying "Passion is energy" holds true.
